Anti-Trespass Panels

Sun-Flex anti-trespass panels are ideal for gaining access to restricted areas.

Discourage and delay access to unauthorized places.

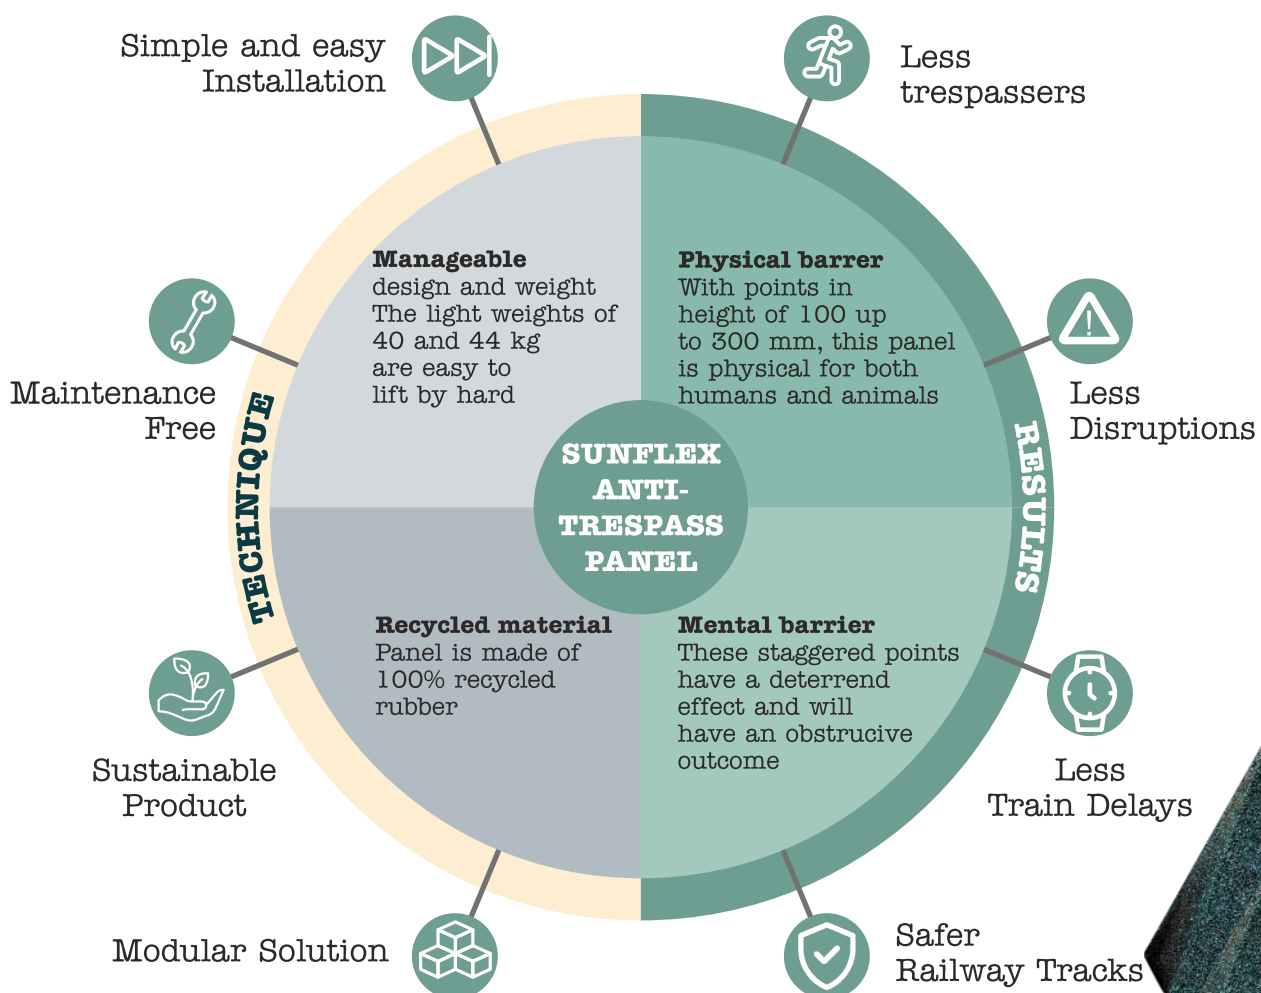

Prevent trespassers, hikers, thieves, and other unpermitted visitors from entering or wandering beside railway tracks, platforms, industrial zones, security fencing, and private property.

The panels' innovative construction enables them to be put swiftly and securely on any surface, including concrete, asphalt, gravel, and grass
Manufactured in INDIA from 100% recycled rubber with polymerically bonded polyurethane.

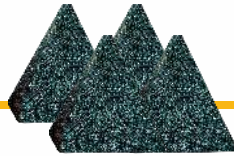

Around a 25-year life expectancy.

Physical and visual deterrent proven.

This can be installed anywhere and then removed and reused indefinitely.

Anti-Trespass Panels

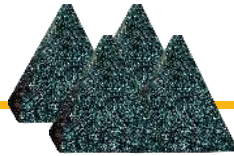

Anti-Trespass Panels for Railway Platforms and Tracks

The Sun-Flex Anti-Trespass Panel is the ideal solution to the disruption caused by humans or animals who enter the railway track, either knowingly or unconsciously.

The increased spikes make it extremely difficult for trespassers to cross the tracks, thus preventing entry.
