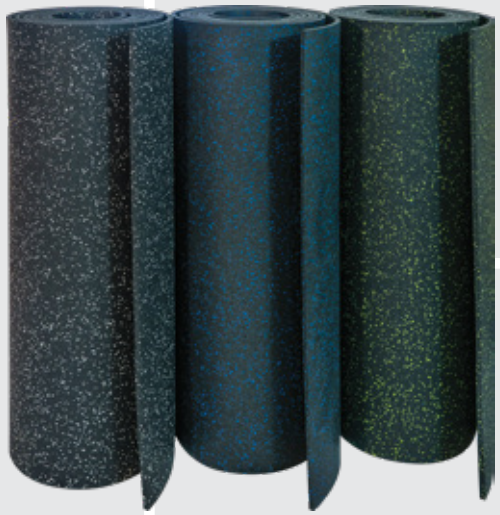
Sun-Flex®
Rubber Flooring

RECYCLED **RUBBER ROLLS**



RUBBER ROLLS **FEATURES**

- Seamless rubber surfacing
- Non-Porous
- Higher Density
- Excellent Wear Resistance
- Infinite color options
- Fitness, Underlayment, Packaging, Load Securing

Recycled rubber rolls provide excellent wear resistance and higher density rubber floors, and this satisfy a wide range of markets and applications. They are SBR rubber rolls polymerically bound crumb rubber and epdm rubber granules.

Rubber Rolls are designed for non-porous, underfoot comfort, anti-fatigue, high slip resistance, minimises foot traffic noise, acoustic properties, easy maintenance, high surface longevity and flexibility. They also serve a purpose in the load securing and packaging industries.

Rubber rolls project and make striking statements in luxury fitness facilities and clubs, while giving a solution that is robust, resilient, and simple to maintain, with great sound insulation, impact absorption and minimising cross joins in many rubber floors installations.
